

My Health Record

Now live at San Radiology

My Health Record is an online summary of your health information which is now being rolled out in pathology and diagnostic imaging.

There is a 7-day delay of your diagnostic imaging reports being available on My Health Record.

We are now sending diagnostic imaging reports to My Health Record as part of a federal government initiative. Please let our reception team know if you would like to opt out.

Our MySRNM patient portal is available on iOS, Android or via www.mysrnm.sanradiology.com.au. It holds all of your diagnostic imaging instantly and reports 7 days after they are available.

Please ask our team about MySRNM today!
