

SYDNEY ADVENTIST HOSPITAL  
SAN DAY SURGERY HORNSBY

# 2022-23 Specialist Directory

# Everyone is different

And at the San we see every dimension of the person. We know there's more to wellness than physical health – so we take care to address the emotional, social and spiritual facets of patient care too.

## San Cancer Services

Sydney Adventist Hospital has consistently been renowned for excellence in multidisciplinary cancer care. Our whole person approach to health is one way the San is unique.

The San Integrated Cancer Centre again led the way in cancer clinics in the 2020 Bureau of Health Information (BHI) Outpatient Cancer Clinics Survey, confirming our status as a leading centre for patient experience and cancer outcomes. The San was recognised internationally as one of the top treatment centres in the Newsweek World's Best Specialized Hospitals 2022 survey.

## San Prostate Centre

Our newly launched Prostate Centre of Excellence focuses on delivering excellent outcomes for patients through research, advanced technology and infrastructure, having leading experts and providing seamless clinical services.

A national reputation for prostate MRI and PSMA PET-CT/PET-MRI imaging and delivery of artificial-intelligence-driven adaptive prostate radiotherapy are supported by our comprehensive multidisciplinary team. Prostate cancer nurses and patient navigators plus extensive allied health services also play a vital role in caring for our patients.

## San Breast Care

San Breast Care has been designed to achieve an outstanding balance between being a high-volume centre with advanced technology, and treating every patient with unique, individualised care.

The culmination of years of experience, teamwork and constant innovation means that San Breast Care brings together all the elements of a truly integrated and multidisciplinary service including imaging, medical, surgical, cancer genetics, radiation oncology, clinical trials, cancer support plus health and wellness services.

## San Rehabilitation

The San offers both day and inpatient rehabilitation programs, co-located at the hospital and incorporating both land and aquatic-based therapies. We care for patients from when it is determined that surgery is required till the completion of their recovery.

A prehabilitation education session helps patients prepare for surgery including individualised exercises, explains what to expect whilst in hospital and on discharge home. Many patients living at home can return home safely and confidently following surgery.

For patients who are clinically assessed to require inpatient rehab, our unit provides an easy and stress-free transition from surgical to rehabilitation ward. Our rehabilitation and pain management doctors are supported by specialist nurses and an allied health team including physio and occupational therapy, social work, speech pathology and psychology.

**For contact details see page 10 (Orthopaedics) and page 12 (Rehabilitation Medicine).**

## Orthopaedic Surgery

Our highly regarded orthopaedic service covers a broad range of treatments, from simple day procedures to complex joint reconstructions and replacements.

With extensive experience, 24 x 7 emergency care, expert surgeons, staff and medical care, the latest in equipment and techniques including robotic-arm assisted hip and knee replacement using the MAKO system, and allied health services it is our goal to deliver premium orthopaedic care and achieve the best outcomes, helping our patients return to pain-free, functional lives.

With a world class orthopaedic team, our care is tailored to optimise patient recovery.

# Integrated Imaging Services

## MAXIMISING REFERRER CONFIDENCE AND PATIENT CARE

San Radiology & Nuclear Medicine (SRNM) is a well-recognised leader in the provision of comprehensive diagnostic and nuclear imaging, theranostics and interventional radiology services, performing more than 91,000 examinations and procedures a year. SRNM provides both hospital and community based imaging services across three locations.

SRNM is particularly well known for our breast, prostate and cardiac imaging programs which extend across both diagnostic and nuclear/PET streams with subspecialty reporting. Our comprehensive suite of 'new generation' imaging equipment enables us to provide world-class imaging services for our patients and referring doctors.

Our team of highly experienced and dedicated Radiologists, Nuclear Medicine Physicians / Specialists, Radiographers, Sonographers, Nurses, Nuclear Medicine Technologists, Secretaries and support staff are committed to delivering high quality and personalised care for our patients.
